**Subject:** Response to CEC Concerning Waste-6 Amendment for LECEF

Lance,

Hopefully this will answer all your concerns regarding Waste-6. If not, just let me know.

1. Q: By your proposed amendment, do you mean to exempt the outfall earthwork from the requirement to have a Soils Management Plan?

A: Yes. The work is being conducted off site, and there's no reason to believe that the soil is potentially contaminated.

2. Q: Are you also requesting a similar change for the combined-cycle project now in the siting process?

A: No. The Waste-6 condition for the combined-cycle plant is the same language that we are asking for in Phase I. So no changes are required for Phase II.

3. Q: Is the owner still "Los Esteros Critical Energy Facility, LLC"?

A: Yes. All references to Calpine in the original amendment request have been replaced with Los Esteros Critical Energy Center, LLC.

4. Q: Is it still a wholly-owned subsidiary of Calpine Corporation? The petition to amend does not state that and you are signing for Calpine.

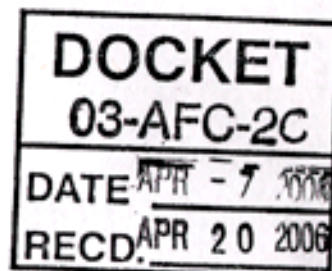

A: Yes. LECEF is still a wholly owned indirect subsidiary of Calpine Corporation and that Calpine Operating Services Company Inc. (my employer) provides O&M services, including compliance related services to the project.

Attached is an electronic copy of the amendment.
